Subject: Drug Lab - Moving Forward

I've gathered that the staff of our Drug Analysis Laboratory were informed yesterday of a transition of the services that they provide to the Division of State Police. The members of our staff understand that the DPS budget may be larger than DPH's and therefore better able to afford these laboratory services. Unfortunately, the way that the information was presented left many of our staff feeling devalued. If this message could be corrected ASAP it would help to set any possible transition off to a better start.

Thank you,
Jill
